## **DETAILED ACTION**

### ***Response to Arguments***

1. This office action is in response to the Amendment filed on 08/21/2009. Claims 1-30, 35 and 49 are cancelled. Claims 31-34 and 36-48 are now pending. Applicant's arguments with respect to the limitation for the exclusion of milk have been fully considered and are persuasive, see MPEP 2173.05 (i). Support for amended Claim 1 can be found in the original disclosure. The claim rejections under §103 of claims 31-34 and 36-48 have been withdrawn.

### ***Allowable Subject Matter***

2. Claims 31-34 and 36-48 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The present claims are allowed over the closest references: Kornena et al. (RU 2099974 C1) and Wirtschaftsprüfungsgesellschaft et al. (GB 1171068).

4. Kornena et al. disclose a method to prepare milk-mustard mixture emulsion that is homogenized in electromagnetic field (Abstract), the method comprising adding emulsifier to and acetic-salt solution; mixing and introducing vegetable oil to produce coarsely-dispersed emulsion, and then homogenizing, wherein homogenizing is conducted in electromagnetic field with magnetic induction 0.1-0.5 T (Abstract). However, Kornena et al. do not teach or fairly suggest the claimed emulsification method comprising, in particular, flowing, conducting or circulating a pre-mix of two or more immiscible liquids through one or more magnetic fields under conditions to emulsify said pre-mix, wherein said pre-mix of two or more immiscible liquids comprises at least a hydrophilic liquid and at least a lipophilic liquid, wherein said lipophilic liquid is selected from the group consisting of edible oils, fats, fatty acids and esters

Art Unit: 1796

thereof and wherein the linear flow rate of said liquids through each said magnetic field is between 0.25 and 25 m/s, and wherein said pre-mix does not comprise milk.

5. Wirtschaftsprüfungsgesellschaft et al. disclose a method to pasteurize beer (page 2, lines 10-11) and/or sterilize or stabilize so that they will keep longer (shelf life) (page 1, lines 25-27), wherein dispersion was exposed to strong electromagnetic force(s) in an induction coil (claim 1) and then through a number of cascade vessels connected in parallel and/or in series (claim 17.) However, Wirtschaftsprüfungsgesellschaft et al. do not teach or fairly suggest the claimed emulsification method comprising, in particular, flowing, conducting or circulating a pre-mix of two or more immiscible liquids through one or more magnetic fields under conditions to emulsify said pre-mix, wherein said lipophilic liquid is selected from the group consisting of edible oils, fats, fatty acids and esters thereof, and wherein the linear flow rate of said liquids through each said magnetic field is between 0.25 and 25 m/s, and wherein said pre-mix does not comprise milk.

There is no prior art of record, alone or in combination teach or fairly suggest the claimed emulsification method. Based on the finding, the linking industrial process claims are also allowable.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 1796
